

Re: Proposition 65

To Whom it May Concern -

Proposition 65 is a California law officially known as the California Safe Drinking Water and Toxic Enforcement Act of 1986. It requires businesses to provide a “clear and reasonable” warning before exposing persons consumers, employees, and the general public to chemicals that are known to the state of California to cause cancer, birth defects, or other reproductive harm. Proposition 65 does not ban the use of any chemicals, but is intended to ensure the public is informed as to its exposure to Listed Chemicals. A business must provide a warning with its product if it is reasonably foreseeable that a person in the California will buy or receive the product.

As of August 2016, OEHHA adopted new safe harbor warning regulations for Proposition 65 that take affect on August 30, 2018. As a result, Burch has taken this opportunity to update its Proposition 65 warning protocols and language to ensure continued compliance with Proposition 65. An example of the new warning is as follows:

 **WARNING:** This product can expose you to chemicals, including [insert chemical name], which is known to the State of California to cause cancer. For more information, go to <https://www.p65warnings.ca.gov>

A business is not required to provide a warning if it can prove that the exposure to any Listed Chemical present in the product resulting from its normal and intended use does not pose a “significant risk” to the average user. Unfortunately, there is little regulatory guidance and with most chemicals listed the State of California has not established a “safe harbor” exposure level requiring us to include chemicals which are only present in trace levels. While we strongly believe that the majority of our products are compliant and none pose a risk we have chosen out of an abundance of caution, like many of our industry colleagues, to provide Proposition 65 warnings for some of our products.

Due to the continual addition/deletion of chemicals from the Proposition 65 list we cannot guarantee that our products will meet Proposition 65 on any given date. Attached to this letter you will find a list of Burch products that currently require a Proposition 65 warning. This list can also be referenced on our website, which will be updated on a regular basis.

If your company intends to introduce Burch products into commerce in California, Burch recommends that you take steps to confirm whether the warning requirements of California’s Proposition 65 are applicable to the products in question and whether your company is complying with those warning requirements for the chemicals contained within these products.

Regards,

Jenni Chilver
Director of Design
Burch

Applicable Proposition 65 Warnings

Antimony Oxide (Antimony trioxide)	 WARNING: This product can expose you to chemicals, including Antimony Oxide (Antimony trioxide), which is known to the State of California to cause cancer. For more information, go to https://www.p65warnings.ca.gov
Diisononyl Phthalate (DINP)	 WARNING: This product can expose you to chemicals, Diisononyl Phthalate (DINP), which is known to the State of California to cause cancer. For more information, go to https://www.p65warnings.ca.gov
N, N-Dimethylformamide	 WARNING: This product can expose you to chemicals, including N, N-Dimethylformamide, which is known to the State of California to cause cancer. For more information, go to https://www.p65warnings.ca.gov
