

PFAS Regulatory Changes: Affecting Our Industry

How does pending PFAS legislation affect the Upholstery Textile / Furniture industry?

PFAS have been commonly used as stain and water-repellents in performance textiles for many years. **This affects performance textiles from all fabric suppliers, not just Burch.** All textile producers, suppliers, and finishers are working collectively to remove PFAS from products to adhere to future legislation.

What products are affected by PFAS industry-wide?

Any woven textile that has been finished with a soil and stain repellent based on conventionally used fluorocarbon chemistry.

Does being PFAS Free mean sacrificing performance?

Typically, yes. Most upholstery textiles, that are conventionally produced, but simply using a PFAS free water-repellent, have proven to be less effective in repelling stains, particularly oil-based ones. More than ever, stains will need to be addressed promptly and correctly by following the manufacturer's published cleaning instructions.

Which Burch Patterns are already PFAS Free?

The majority of Burch's products are (and have always been) PFAS Free including:

- **All Coated Fabrics (Vinyl, Polyurethane, Silicone)**
- **All Panel and Acoustic Fabrics**
- **Any Woven Fabric Without a Soil and Stain Repellent Finish**
- **Any Woven Fabric Introduced in 2023 and Newer**

Will Burch fabrics that contain PFAS be reformulated to be PFAS Free?

Yes. In anticipation of regulatory changes, Burch has been proactively transitioning all applicable fabrics to a PFAS Free formulation. The current status of a product's transition to a PFAS Free formulation is dependent on SKU, finish, and fabric receipt date.

How can I find out if a Burch fabric is PFAS Free?

1. Reference the attached list (next page). If a product is listed in transition, simply contact burchfab@burchfabrics.com to confirm the color you need is available in the PFAS Free formulation.
2. Visit [burchfabrics.com](https://www.burchfabrics.com) and use the Fabric Finder to filter your search. Select "PFAS Free" in the Attributes menu. Click Find Fabrics.

PFAS FREE GUIDE - CURRENT PRODUCT LIST

PFAS Free Products	Woven Fabrics Transitioning to PFAS Free*
