

How to Clean Badlands

100% HYPHYN™ Biodegradable Vinyl

Hyphyn™ Vinyl biodegrades over 90% within 24 months in landfill conditions, per ASTM D5511 testing. Its patented enzyme system activates only in anaerobic landfill environments, breaking down the material into inert components like CO₂, methane, and biomass without producing microplastics or harmful residues. Post-biodegradation soil tests confirm zero detectable chemicals of concern, with 100% plant germination in resulting soil, ensuring environmental safety.

This pattern also features the finish Resilience™ which represents the latest in technology in Faux Leather and Vinyl Protection, enhancing performance where it is needed the most.

Prompt cleaning is always recommended.
